

Aluminium glass sliding door

Features and Data

Sliding Door System "Salyut" (Item No.:28.29.421)

For installation with single glass panel or double (biparting) door panels;
Wall mounted.

For 8-12mm glass thickness.

Max. load capacity: 70 kg

Calculation of glass height: $GH = LH + X + 23.5$

Calculation of glass width: $GW = LX + 100$

GW = Glass width

GH = Glass height

H = Distance holes center for rail to ground

LH = Clear opening height

LW = Clear opening width

X = Distance cover edge to the opening upper side
